Dear Norris:

The following suggestion is made for your consideration:

(1) Hempelmann and Large -- organization of Wet Test monitoring and teaching of new men. Large to be replaced by a good surgeon from Oak Ridge, probably Dr. Clark who was here before.

(2) Nolan to organize (for permanent set up) the Tech. monitoring at Y Site with Whipple in charge. Nolan also to help Hempelmann with teaching and organization of Wet Test group.

(3) Nolan and Hempelmann now to be put on B pay roll.

(two weeks before and during)

(4) Nolan and Hempelmann to be sent out two weeks before each test and to return with two weeks off each test. And must have plane priority for this. Arrangements for after 1 July still fluid.

Hope this is agreeable.

Stafford Warren
